DETAILED ACTION

1. Claims 1-16 were examined.

Section I: Finality Withdrawn

2. In response to the telephone conversation on 8/25/05, with Ms. Linda Wood, the finality of the last office action dated 3/25/05 is withdrawn.

Section II: (Non-Final Rejection 3rd Office Action)

Claim Interpretation

3. Office personnel are to give claims their "**broadest reasonable interpretation**" in light of the supporting disclosure. *In re Morris*, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023, 1027-28 (Fed. Cir. 1997). Limitations appearing in the specification but not recited in the claim are not read into the claim. *In re Prater*, 415 F.2d 1393, 1404-05, 162 USPQ 541, 550-551 (CCPA 1969). See *also *In re Zletz*, 893 F.2d 319, 321-22, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989) ("During patent examination the pending claims must be interpreted as broadly as their terms reasonably allow") The reason is simply that during patent prosecution when claims can be amended, ambiguities should be recognized, scope and breadth of language explored, and clarification imposed An essential purpose of patent examination is to fashion claims that are precise, clear, correct, and unambiguous. Only in this way can uncertainties of claim scope be

removed, as much as possible, during the administrative process. The examiner equates the terms "redundant" and "unnecessary".

Claim Rejections - 35 USC § 103

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-16 are rejected under 35 U.S.C. 103(b) as being unpatentable by Migdal et al., (U.S. Patent 6,208,347 (2001)) in view of Kramer et al., (U.S. 5,452,238 (1995)). Migdal et al., teaches a system and method for modeling 3D objects with the capability of deleting redundant shapes; but doesn't teach geometric constraint of geometric objects. Kramer et al., teaches a method for finding possible configurations of a system having a collection of geometric entities and constraints which

encompasses sketching and design, geometric modeling for CAD, kinematic analysis of robots and linkage mechanism (abstract).

At the time of invention, it would have been obvious to one of ordinary skill in the art to modify Kramer et al. by Migdal et al. to yield a solid structure (Kramer: column 3, lines 13-15).
